[REDACTED] 1. On 1 September 1952, the Chinese Communists began construction of a wool spinning plant and a wool weaving plant at a site north of Chouchiachuang (0719/1367/5445) in the western sector of Lanchow. Authorization for the construction of these plants had been granted in July 1951 by the Industry Department of the Northwest Military and Administrative Committee. It was estimated that the construction will take from a year to a year and four months. By July 1954 a complete factory unit, including a wool washing plant, a wool combing plant, and a dyeing factory, will be in operation. Power machinery is to be supplied by the First Machine Building Ministry of the Chinese Communist Government.

Hong Kong

25X1

[REDACTED] 2. Since April 1952, five thousand civilian laborers have been building an underground work site for the Chuchou (113-06, 27-53) arsenal and steel mill. This site is between the mountains at the point where the Canton-Hankow and the Chuchou-P'ingshiang (113-50, 27-37) railroads intersect. By mid-July all the machinery had been moved from the arsenal and the steel mill into the underground shelters. The arsenal has been producing light infantry weapons, bazookas, and 60 mm. mortars. The output of the arsenal and steel mill under Chinese Communist direction is twice what it had been under Nationalist management.
